

Ideal Standard Tris

Three worlds in one: shower, sauna and steam

BODY & MIND

*Ideal
Standard*

B O D Y & M I N D

For Ideal Standard, creativity is the most important element within the evolution of the world of showering and bathing. **Design** and **technology** combine to achieve your dreams, create your style and express your own personality to the full in this corner of the world that is so essential for regenerating body and mind. The extraordinary know-how behind the brand enables innovative materials to be **perfectly combined**, thus creating unique products, as splendid as they are functional. The result of this new integrated approach, combined with the use of good quality materials, is to provide you with the maximum **emotion** and **pleasure**.

A private place of well-being.

Relax, relax, relax.

Your very own personal space
dedicated to pleasure and well-being.

This is Tris, the first multi-functional
shower cabin, enclosing a shower,
sauna and steam room, in a space no
bigger than the length of a bath tub.

Relieve stress and tension with a
relaxing tropical rain shower or
stimulating hydromassage. Rediscover
your mental and physical well-being
thanks to aromatherapy and the
beneficial effects of steam.

This is an innovative, unique product,
offering you maximum safety thanks to
the high technology of its design and
construction.

Tris. At long last, well-being at home.

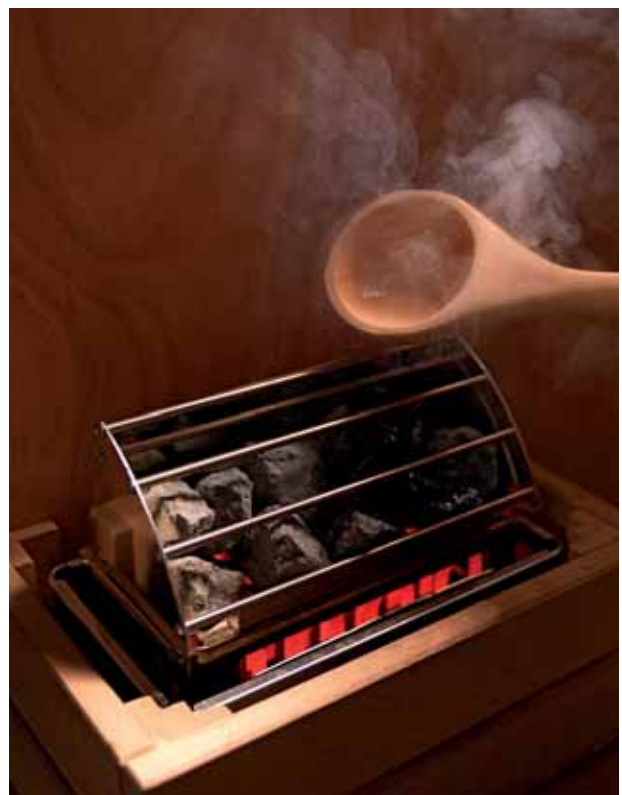

Sauna: some like it hot.

The ritual of the sauna has become high tech.

The pleasure of stretching out, relaxing and completely cleansing yourself. Would you really share it with just anyone? With Tris you can have your own private space to unwind and enhance your wellbeing. Use it regularly to re-establish your mental and physical balance. You'll discover that the sauna improves blood circulation, detoxifies, relaxes the muscles and purifies the skin by eliminating acids and toxins. The occasional sprinkle of water onto the hot stones will regulate the humidity.

Stove

The stove is the pulsating heart of the sauna. It is accompanied by 2 kg of volcanic stones, and a bucket and ladle made from Iroko wood.

How it works

sauna

Hygrometer

The hygrometer measures the level of humidity inside Tris.

Touch panel

By using the touch controls on the "Touch panel" keypad you can easily programme the length and temperature of the sauna, altering it to meet your requirements.

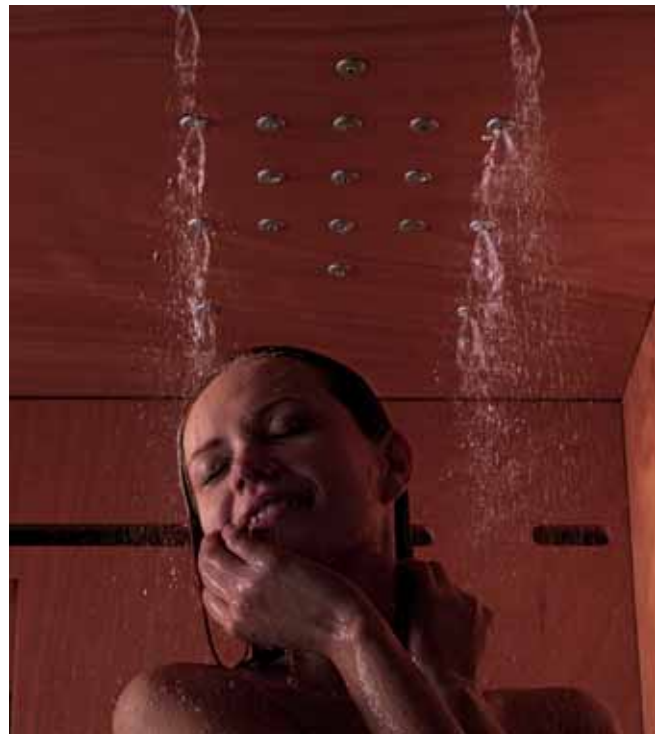

Shower: it's raining.

Hydromassage, mist jets and a rain function: taking a shower will be an unforgettable experience.

Not everyone can choose to take a shower in a different way every time. With Tris you can.

This is all thanks to the dual function overhead shower (normal rain or mist jet tropical rain), hydromassage body jets and handspray. That's the magic of Tris: each shower is a unique experience.

+ Technology

The shower function

The dual function overhead shower has 11 nozzles for normal rain and 8 mist nozzles for tropical rain. The hydromassage function has 6 body jets.

Thermostatic mixer

The thermostatic shower mixer controls water flow as well as maintaining your ideal water temperature. It is made of special heat resistant materials which are safe to the touch.

Hand spray

The slim single function hand spray has a retractable 1.25m long hose. It has silicone nozzles which resist limescale formation and is made from a heat resistant material.

Foldable seat

In order to guarantee maximum comfort and an optimal use of the shower area, the seat can be completely folded back against the wall.

Steam bath: a Turkish bath at home.

You can relax, everything is under control.

One of the most ancient ways of rejuvenating your body unites with the most up-to-date technology, to give you maximum well-being. This is Tris' steam room, with an oil burner for aromatherapy and a digital touch panel for temperature control. A truly revitalising environment, one which combats stress, rheumatic pain and muscular tension and also purifies the skin by making it softer, more supple and more luminous.

+ Well-being

Steam dispenser

Make your steam room a unique experience by using essential oils. It only takes a few drops of your favourite essence poured into the appropriate container for you to enjoy the benefits of aromatherapy.

Water functions

During the steam room, use one of the shower functions to wet your body. A positive effect of the hot-cold process is an improvement in blood circulation.

Temperature

By using the sauna's stove, Tris' designers have studied a way of pre-heating the inside of the sauna to maintain an internal temperature of 40 degrees, so that you will find the surroundings already at an ideal temperature.

The temperature inside the steam room ranges from 40° to 60°. Humidity reaches 100%.

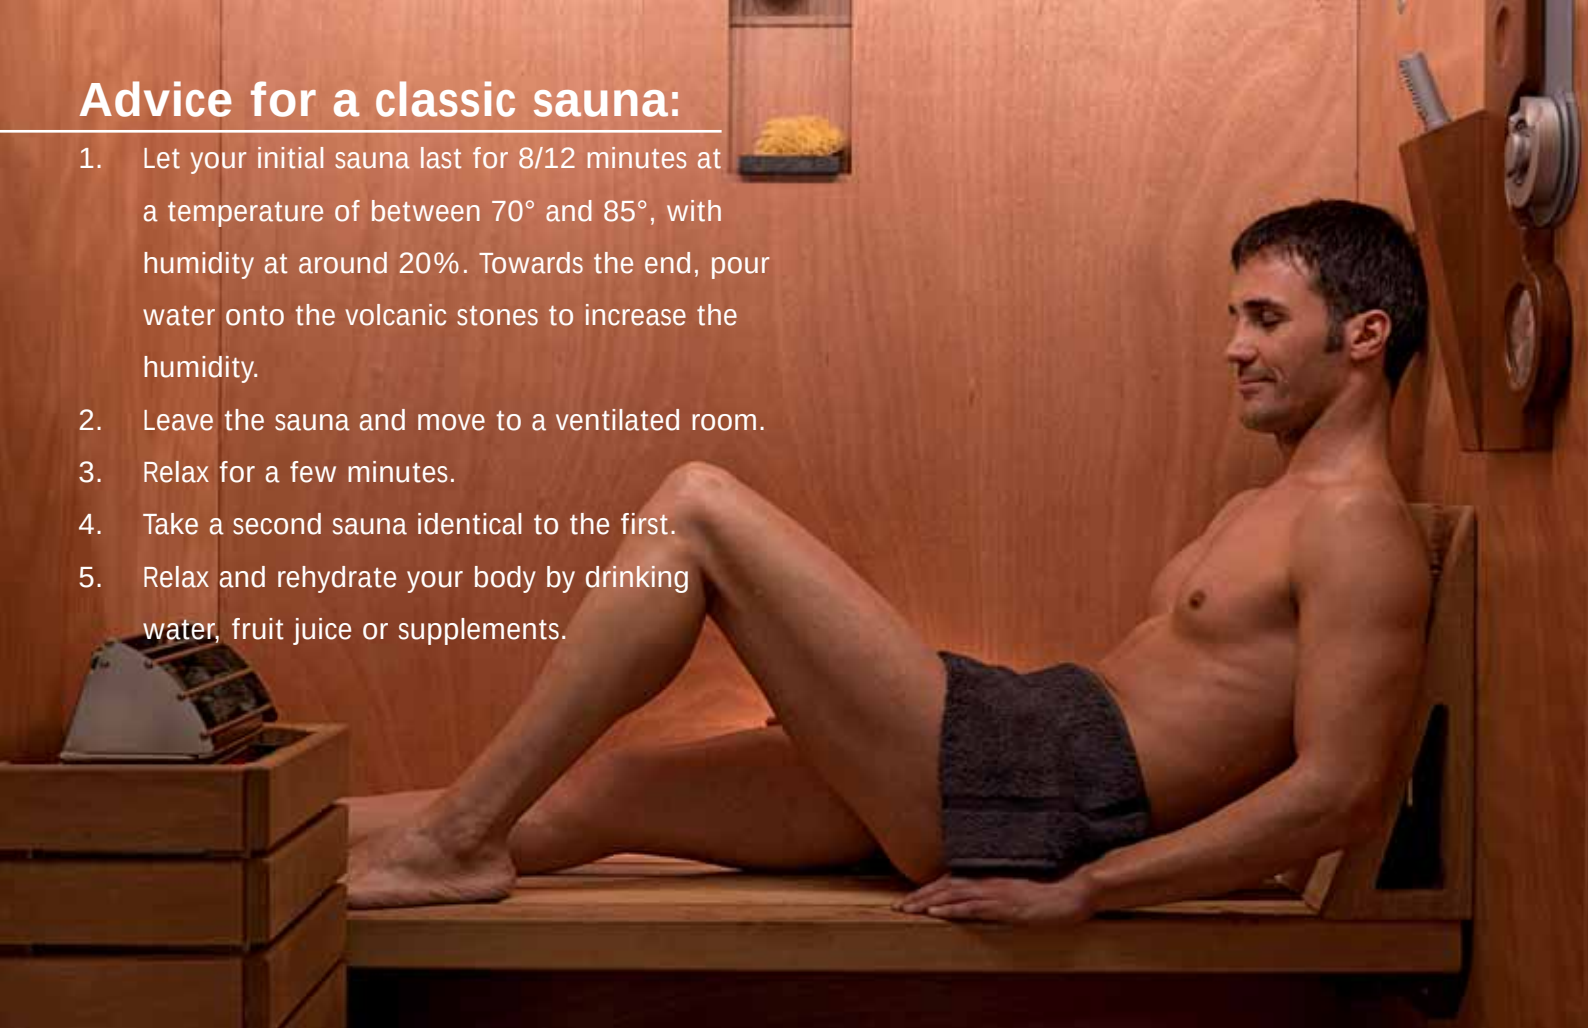

Three ways to experience well-being
in a world of technology.

Advice for a classic sauna:

1. Let your initial sauna last for 8/12 minutes at a temperature of between 70° and 85°, with humidity at around 20%. Towards the end, pour water onto the volcanic stones to increase the humidity.
2. Leave the sauna and move to a ventilated room.
3. Relax for a few minutes.
4. Take a second sauna identical to the first.
5. Relax and rehydrate your body by drinking water, fruit juice or supplements.

Advice for an ideal steam bath:

1. Choose a relaxing, comfortable position.
2. Use initially for around 20 minutes, at a temperature of between 40° and 60°. Rub your skin lightly with an exfoliating glove to get rid of dead cells and stimulate circulation.
3. Take a cold shower.
4. Repeat the cycle for around 15 minutes.
5. Take another cold shower.
6. Once finished, dry off slowly to let your body readjust to the surrounding temperature.
7. Lie down and relax for at least 20 minutes taking care to cover yourself up.
8. Remember to replenish lost liquids by drinking water, fruit juices or supplements.

Tris: very special details.

Shower options

There are 3 different water effects:
Normal rain which uses 11 overhead nozzles
Tropical rain which uses 8 overhead mist nozzles
Hydromassage which uses the 6 lateral body jets.

Hand spray

The slim single function hand spray has a retractable 1.25m long hose. It is made from a heat resistant material with silicone nozzles which resist limescale formation.

Thermostatic mixer

The thermostatic shower mixer controls water flow as well as maintaining your ideal water temperature. It is made of special heat resistant materials which are safe to the touch.

Stove

This is the pulsating heart of the sauna. It is accompanied by 2 kg of volcanic stones, a bucket and a ladle made of Iroko wood.

Hygrometer

This measures the precise level of humidity inside Tris.

Bucket

With Tris you have a bucket and ladle made of Iroko wood. Use them to pour water on the burning volcanic stones and maintain the ideal humidity.

Temperature

The temperature control inside a steam room ranges from 45° to 60°. Humidity reaches 100%.

Steam dispenser

Make your steam room a unique experience by using essential oils. It only takes a few drops of your favourite oil poured into the appropriate container for you to enjoy the benefits of aromatherapy.

Foldable seat

In order to guarantee maximum comfort and an optimal use of the shower area, the seat can be completely folded back against the wall.

Upper grids

These guarantee complete drying of the unit.

Removable wooden floor

(3 section floor panels) Can be raised completely for total cleaning.

Material

Specially treated wood, the natural oil treatment allows the wood to breathe whilst providing it with a water resistant coating.

Robe hooks

There is an Iroko wood robe hook and a hanging rail on the outside of the cabin to keep your essentials close at hand.

Glass

For peace of mind Tris is made from double glazed glass.

- **Ventilated system:** the ventilation grills at the top and bottom of Tris ensure that a stable temperature is maintained throughout the cabin.
- **Product cleaning:** follow the user manual. For wood, use a damp cloth; for glass use an appropriate product, paying attention to the seals and to the wood.
- **Guarantee and advice:** Our confidence in the quality and reliability of Ideal Standard products enables us to offer a 2 year guarantee. To receive an additional one year warranty free of charge simply register your Tris Cabin on 0870 1296085.
- **After sales support:** Ideal Standard have a dedicated after care and support team, for more information call customer care on 0870 1296085.

Tris is three in one: shower, sauna and steam room.

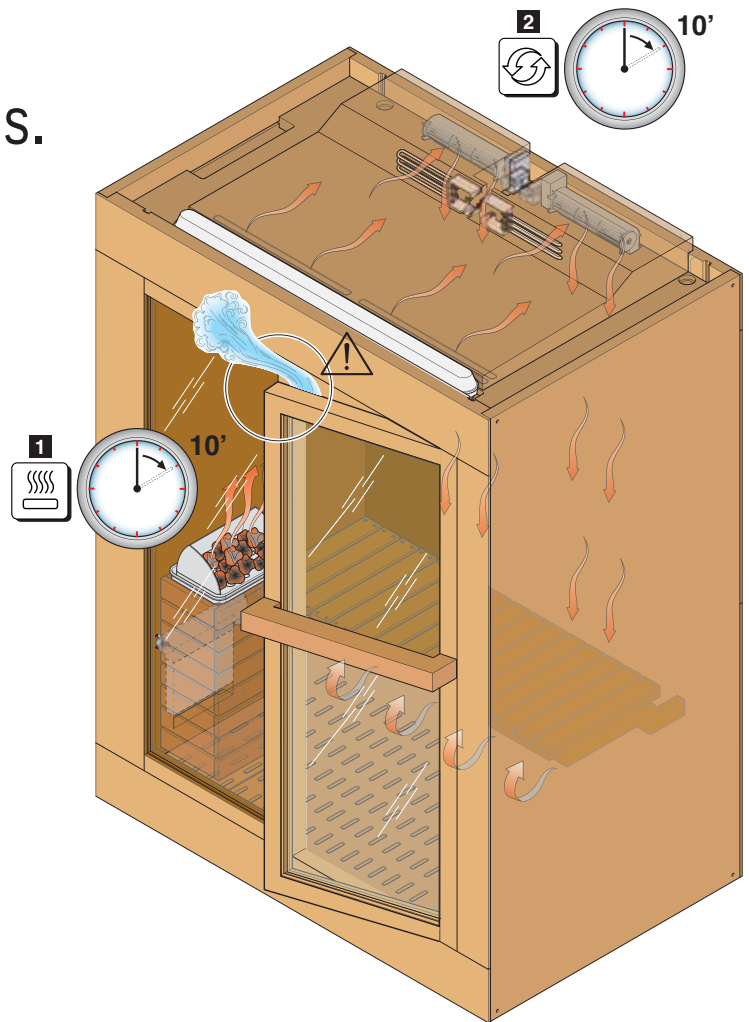

Tris

Important: it is not possible to use the three functions at the same time. Follow the user manual carefully.

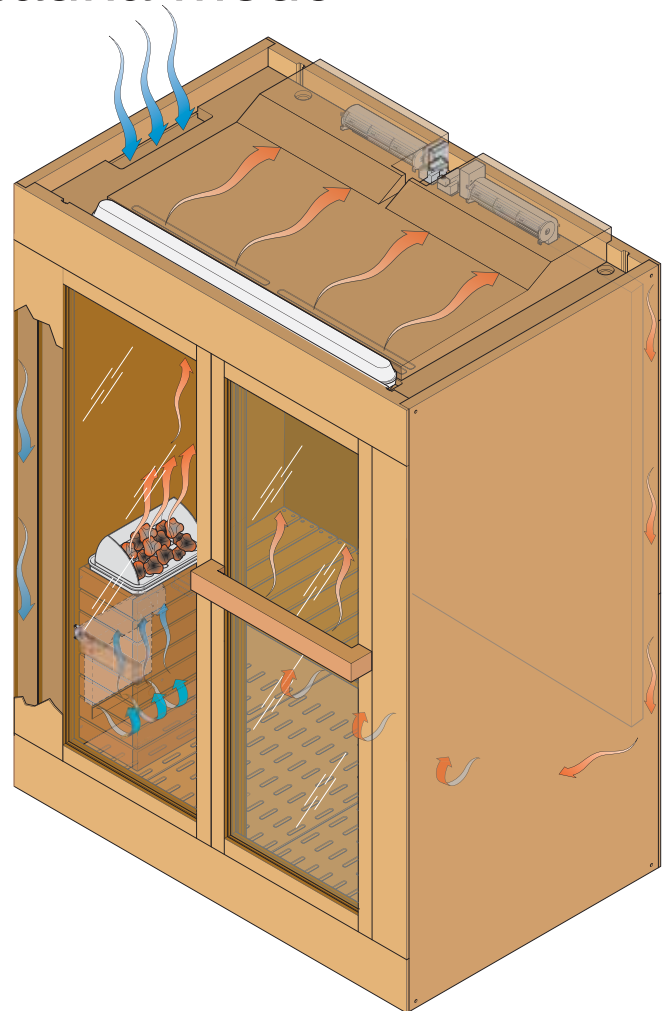

Drying cycle Technical Specifications.

After using any shower function or the steam room function, TRIS automatically starts the process of completely drying the unit, guaranteeing that the product will be constantly and correctly maintained. The process operates in 2 cycles of 10 minutes each. The first cycle circulates the hot air coming from the stove, whilst the second circulates the cold air from outside. After the 2 cycles, the product is dry.

Uniform temperature in sauna mode Technical Specifications.

When using the sauna function, TRIS guarantees uniform temperature throughout the unit. Thanks to the presence of the two fans located in the upper part of the product, the hot air is recycled minimising the change in heat from the upper section to the lower section.

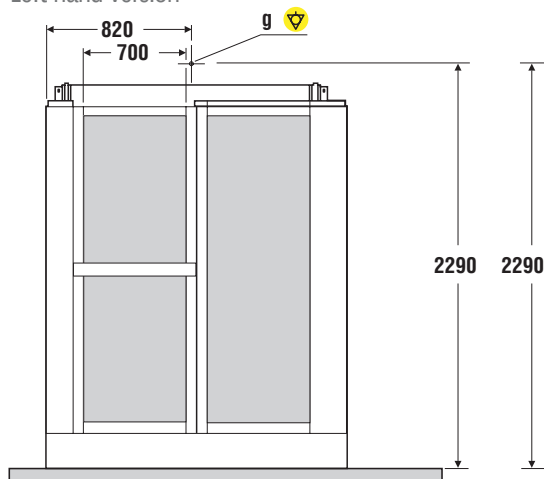

TECHNICAL SPECIFICATIONS WITH WATER INLET/OUTLET CONNECTION AND ELECTRIC PANEL

All measurements are in cm. Sizing tolerances ± 5 mm.

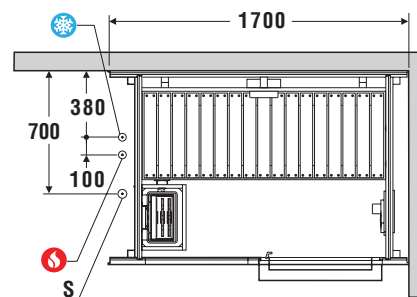

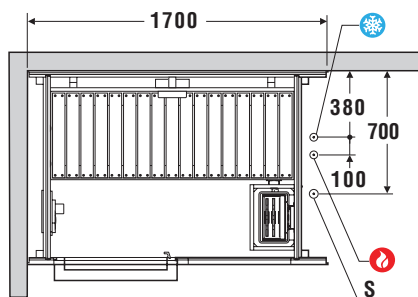

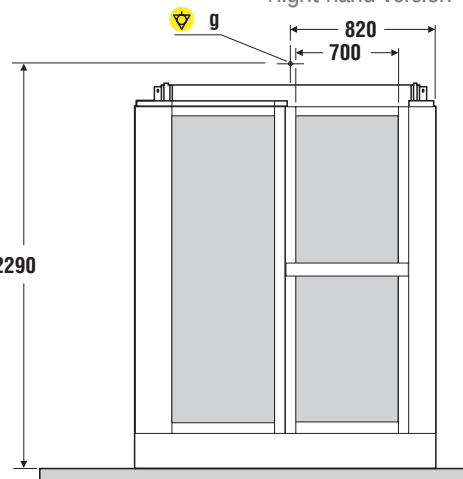

-  Hot water connection 1/2"
-  Cold water connection 1/2"
-  Power supply outlet and equipotential connection cable
-  Outlet $\varnothing 40$

- 
 - All connections must be at floor level
 - Minimum height bathroom 250 cm for maintenance
 - The product will have to be assembled with finished floors and walls
 - The product cannot be installed in carpeted areas
 - The product can never be set into the wall
